

QA ON-DEMAND

Our on-demand service provides extremely fast ramp-up speeds and project flexibility; depending on project scope, iBeta can usually ramp-up within 1-2 days.

FULL TRANSPARENCY

Our full transparency spans from the contract phase to project completion with itemized pricing, reliable cost estimates, constant communication, daily status reports, and no last minute surprises—ever.

NO CONTRACTUAL MINIMUMS

We don't lock clients into a long-term contract, like many other testing firms do; instead, we choose to build long-term relationships and keep our clients coming back, simply because they like working with us.

KNOWLEDGE RETENTION

Our minimal employee turnover combined with special scheduling, allows us to provide our clients almost every time with the same Project Manager and test team members for all of their projects at no extra cost.

SEAMLESS INTEGRATION

Our services fully adhere to our clients' methodologies and processes. It is our #1 goal to seamlessly integrate with existing in-house QA teams, and to relieve some of the stress of tight QA timelines.

COMPLETE INDEPENDENCE

iBeta has no vested interest in selling third party software to its clients. We focus our efforts solely on providing the most cost effective testing solutions.
